## MAISTIC home compostable food bags Made from plant residues

These new 2. GEN compostable food bags are based on the second generation bio-plast PHA type produced from plant residues in food production. Residues that would otherwise be treated as waste and burned or otherwise disposed of. Now we use it as a raw material in an everyday consumer good.

### 2.GEN – also good for the health

They are certified compostable meaning that they are fully bio-degradable in your own suited compost bin with the right right conditions like e.g. temperature.

Maistic Food Bags doesn't contain phthalates, Bisphenol-A, F, or S, nor other harmful chemicals or plasticisers used in traditional plastics – simply because of the OK Compost Home certifications, that doesn't allow plastic and their chemicals. Why?
